C.T. BOLTS

Keeping It Together

MILD STEEL BOLTS & NUTS:

These are stocked as complete units, also known as XOX. They are only available in metric thread and are stocked in M6 – M30 diameters in all the popular lengths. They are priced in Kg's, conversions from units available on request, and the thread lengths are 2d + 6mm up to 125mm long and 2d + 12mm for the longer length bolts.

Also in the Mild Steel range we have Countersunk Square, Countersunk Nib and Cup Square Bolts & Nuts, available in the popular range of sizes. We supply 25Kg bags for the larger consumers at Wholesale prices.

MILD STEEL HEX SETS:

These are available for customers requiring a longer thread, being fully threaded. Nuts are available separately and these are priced per unit. They are also only available in the metric form and diameters stocked are from M6 – M20 in all popular length

MILD STEEL STUDDING:

This is fully threaded bar in metric sizes, 1,000mm long, suitable for various applications requiring different length fasteners, whereby it can be cut and a nut placed on either end to fasten. We also offer Galvanized Studding.

NUTS:

Available are Nyloc (Metric, UNC & UNF), Mild Steel, Grade 8, Slotted, Dome, Brass, Wing & Check Nuts.

WASHERS:

Stocked are Bright Round, Black Square, Black Square Tapered, Black Square Plate, Spring and Mudguard (also known as Fender) washers. All diameters are available and the smaller sizes of round washers are priced in boxed quantities of 200 units whilst the larger ones are sold either individually or in boxes of 100 units. The square washers are priced per Kg.

HIGH TENSILE SETS/BOLTS & NUTS:

These are stocked in metric, UNC & UNF thread forms. The shorter fasteners are fully threaded, known as HT Sets and the longer fasteners with plain shank are called HT Bolts. Grade 8 nuts are available to match the fasteners. This product is priced individually.

WOODSCREWS:

Full ranges of Countersunk Slotted Woodscrews are available in boxed quantities of 200 units.

SELF-TAPPING SCREWS:

We carry a range of Countersunk Raised and Pan Head Self Tapping Screws. These are hardened and nickel plated and available in boxed quantities.

VERANDAH BOLTS & NUTS:

These are also known as Gutter Bolts and are stocked in M6 diameter from 12mm up to 75mm These are galvanized and are sold either as units or in boxed quantities of 200 units.

NAILS AND NAIL PRODUCTS:

Available are all the sizes of Round Head Wire Nails, Fencing Staples, Oval Brad Nails, Clout Nails and Hardened Steel Nails. All these products are priced per Kg.

SOCKET SCREWS AND ALLIED PRODUCTS:

We stock Cap Head, CSK Head and Grub (Set) Screws. Predominately Metric thread forms are available and complimenting the product we carry a full range of Socket Keys.

ROOFING FASTENERS:

Stocked are Hook Bolts, Spiral Nails, DTUH (Drive Thread Unslotted Head) Roof Screws, Tek Screws, Sealing Washers and Bonded Washers

SPLIT PINS:

Wide range available in all sizes and sold either as units or in packs of 100 units, in packaged quantities.

ELECTRICAL COMPONENTS:

We manufacture and stock Cable Glands, Line Taps & Conduit Bushes. We also manufacture and stock Eye Bolts, Insulator Straps and Irons in the popular sizes. Non-standard sizes in suitable quantities can be manufactured.

MACHINE SCREWS:

Stocked are Countersunk and Pan Head Machine screws. They have a slotted head and a metric thread, are priced in boxed quantities of 200 units and nuts are available separately.

FASTENERS FOR THE CONSTRUCTION INDUSTRY:

Stocked are Bolt Projecting Wall Anchors, Corrugated Foundation Bolts/Nuts and plastic Wall Plugs. To compliment the range we stock all the corresponding size Masonry Drills.

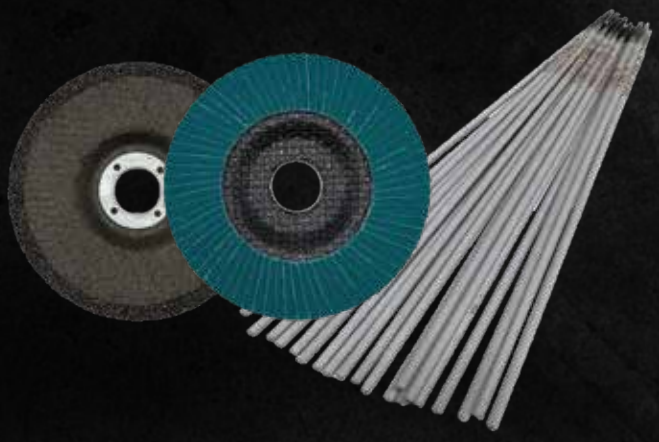

VEHICLE SPARES:

In our well-equipped factory we manufacture various spares for vehicles, such as Wheel Studs, Wheel Nuts, Manganese Bushes, Shackle Pins, "U" Bolts and Centre Spring Bolts, which we supply to the spares dealerships.

GRINDING CUTTING DISCS, WELDING RODS:

Available is a popular range of Steel Grinding Discs, as well as Steel and Masonry Cutting Discs and Vitamix Welding Rods which are available in 10 and 12 gauge.

ALUMINUM BLIND RIVETS:

Also known as Pop Rivets, a comprehensive range is available. Also available are Rivet Guns, which are required to utilize the fasteners.

SPECIALIZED FABRICATION

Specialized fabrication refers to the custom manufacturing of complex metal components, structures, or machinery designed for high-performance or niche industrial applications. Unlike standard manufacturing, it focuses on projects with unique operational, environmental, or material requirements

AGRICULTURE IMPERIAL BOLTS

Imperial bolts for agricultural applications are primarily categorized by their strength grade and thread type, which are measured in inches rather than millimeters. These fasteners are essential for high-stress farm machinery such as tractors, ploughs, and harvesters, where they must withstand continuous vibration and heavy loads.

MINING BOLTS SECTION (HD BOLTS)

High-performance reinforcement elements used to stabilize rock masses and secure heavy steel sections. They are specifically designed for environments where significant rock deformation or seismic activity is anticipated, providing superior initial stiffness followed by high post-yield ductility

M10X120 FULLY THREADED ROOFING FASTENERS

M10 fasteners with a 120mm length are highly specialized components, as standard metric lengths typically jump from 120mm to 130mm or 150mm. For roofing applications, these are usually characterized by mushroom or flat heads to distribute load and prevent damage to thin roofing sheets.
